Differences Between Procedural Programming and Object-Oriented Programming

Name: Section Code: A263
                                                                                           Date: January 28, 2020

Mamugay, Regime
Balabagno, Jether
Tagoc, Emmanuel
Bag-ao, Krishya Crysten
Hellicania, Dave

Schedule: 7:30 - 10:00 TTH

Procedural Programming	Object Oriented Programming
Procedure	Method
Record	Object
Module	Class
Procedural call	Message

https://neonbrand.com/website-design/procedural-programming-vs-object-oriented-programming-a-review/

Explanation:

Because of its unique advantages like the modularity of the code and the ability to directly associate real-world business problems in terms of code.
The advantages of OOP is it has a higher quality software, faster in developing applications, and when it comes to code you can reuse and recycle it. When it comes to software it makes *easier to maintain.* Since the design is modular, part of the system can be updated in case of issues without a need to make large-scale changes
